IDRIS MAHMOR ALIIMRAN BIN MUSTAPA

Kuala Lumpur | 011-1500 9757 | mahmormust@gmail.com | Portfolio

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in enterprise banking and government systems. Currently an Analyst, System Development at Microlink Solutions Berhad, building core hire purchase and Islamic financing modules with C#/.NET, Java, Pro*C and Oracle SQL. Also experienced in full-stack web development with Laravel, Vue.js and Docker, with strengths in defect analysis and UAT and production support.

PROFESSIONAL EXPERIENCE

Analyst, System Development **October 2025 – Present**

Microlink Solutions Berhad, Kuala Lumpur

- Develop, enhance and maintain modules of the RHB Bank core hire purchase (HP) and Islamic financing (IF) system on the bank's core platform, using C#/.NET, Java, Pro*C, Oracle SQL, ASP.NET Web Forms and JavaScript.
- Perform root cause analysis of SIT, UAT and production defects across the ASP.NET front-end, C# middleware and Java host layers through code tracing, debugging and Oracle data validation.
- Design technical solutions for change requests and document them in Engineering Design Documents (EDD) and unit test results, with source control in Git and defect tracking in Mantis.

Junior Software Developer **March 2025 – September 2025**

Alto Soft Sdn. Bhd.

- Developed and maintained full-stack web application systems for government and association clients using Laravel, Vue.js, Tailwind CSS, Shadcn-vue and Bootstrap.
- Built new modules and delivered change requests, including development of two modules for the Kementerian Kerja Raya MyINFRA system in a Docker-based microservices architecture.
- Performed preventive maintenance, server monitoring, code reviews and debugging, and logged defects for resolution.

Software Developer (Intern) **October 2024 – March 2025**

Alto Soft Sdn. Bhd.

- Contributed to the development of new web systems for two associations, replacing paper-based processes with online systems.
- Built mobile-friendly interfaces with Tailwind CSS and reusable Shadcn-vue components.
- Integrated Laravel back-end processing for secure data handling.

KEY PROJECTS

RHB Bank – Hire Purchase & Islamic Financing System

*Microlink Solutions Berhad | C#/.NET, Java, Pro*C, Oracle SQL, ASP.NET Web Forms, JavaScript*

Agreement Documents & E-Signature

- Enhanced the Hire Purchase Agreement (HPA) document generation and mail merge pipeline (merged PDF and printing) for HP and IF flows, with per-document PDF password protection.
- Delivered e-signature business rules from the bank's change requests, including a manual (wet ink) signing fallback across guarantors, standing instruction (SI) consent flows and document listing on preview screens.
- Added signature display rules for the marketing officer and each guarantor on agreement documents, and reviewed MyKad biometric verification logic.
- Traced and fixed document printing issues where a missing front-end option override and a skipped sequence assignment in the data access layer caused missing transaction data.

API & Integration

- Developed a hire purchase account inquiry JSON API for a national open finance initiative, exposed through the bank's API middleware, with a new Java host program covering hire purchase and floor stock accounts.
- Added a maintenance screen for the API key, stored in the database instead of configuration files.
- Prepared the Engineering Design Document (EDD) for the API change request.
- Aligned API responses with existing REST service conventions, with request security and encryption handled at the bank's API gateway.

Batch Processing, Database & Support

- Debugged and fixed Pro*C batch programs that generate Basel / BNM regulatory output files, using GDB, and wrote Oracle SQL for data extraction and correction.
- Fixed missing columns in a batch SQL cursor that produced null values in data warehouse output, and resolved truncated output caused by a stale compiled binary.
- Resolved runtime errors in post-submit and document preparation flows (null reference, out-of-range, date format and missing directory errors) by adding guard checks.

- Traced defects across JavaScript, C# and Java layers, following the bank's change-control conventions with tagged code changes and traceable revision history.

MyINFRA – Government Immovable Asset Management System (Kementerian Kerja Raya)
Alto Soft Sdn. Bhd. | *Laravel, Vue.js, Docker*

- Developed modules as Laravel and Vue.js services in a Docker-based microservices architecture and resolved Docker environment issues such as storage and cache folder permissions.
- Built the asset loss and write-off (Hapus Kira) module under TPATA 2024 government guidelines, with a 4-stage approval workflow, role- and location-based access from district to ministry level, time-limited token access for external parties and automated SLA email reminders.
- Built the asset operation and maintenance planning module for preparing, verifying and monitoring annual maintenance plans and budgets at premises level, aligned to approved budget allocations.
- Implemented quarterly loss and write-off reports, a shared reference number format for initial and final reports, and a correction flow that returns records to the original creator with a full audit trail.

Sistem Perumahan Penjawat Awam Malaysia
Alto Soft Sdn. Bhd. | *Laravel, Bootstrap*

- Developed a new Aduan (Complaint) module allowing registered and public users to submit complaints or inquiries, with internal routing for responses.
- Implemented public-facing access through email links for tracking and replying to external complaints.
- Delivered change requests and performed preventive maintenance, including server monitoring and routine health checks.

Sistem Ahli KPPPSM – Kesatuan Pembantu Pembedahan Pergigian Semalaysia
Alto Soft Sdn. Bhd. | *Vue.js, Tailwind CSS, Shadcn-vue, Laravel*

- Developed a new membership web system that replaced paper-based processes, starting during internship.
- Took full ownership of the project after internship, managing all change requests and enhancements based on client feedback.
- Built a mobile-friendly interface with Tailwind CSS and reusable Shadcn-vue components, with a Laravel back-end.
- Built member features including membership applications, benefit records and official letter generation.

Sistem Ahli ANULAE
Alto Soft Sdn. Bhd. | *Vue.js, Tailwind CSS, Shadcn-vue, Laravel*

- Led the rebuild of the membership management system front-end from scratch using Vue.js and Shadcn-vue modular components.
- Built responsive, accessible UI with Tailwind CSS and integrated Laravel back-end APIs.
- Conducted code reviews and debugging to maintain code quality.

Multimodal Attendance Tracking System (Facial Recognition, RFID and Digital Data Entry) **2024**
Final Year Project, UTeM | *Laravel, Flutter, MySQL, Arduino, MTCNN*

- Built a multimodal attendance system combining RFID (Arduino), facial recognition (MTCNN) and digital data entry.
- Developed a Laravel back-end with a MySQL database and a web dashboard for administrators and teachers.
- Developed a Flutter mobile app for parents to request student leave.

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM), Melaka **September 2021 – March 2025**
Bachelor of Computer Science (Software Development) with Honours – CGPA 3.67

Kolej Matrikulasi Johor, Tangkak, Johor
Science Module III – CGPA 3.83

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET, ASP.NET Web Forms, VB.NET, Java, Spring Boot, C, Pro*C, JavaScript, PHP, Laravel, Vue.js, Nuxt.js, Flutter, HTML, CSS, Tailwind CSS, Bootstrap, Shadcn-vue
- **Databases & Tools:** Oracle SQL, MySQL, Git, GitHub, GitLab, Docker, Mantis, Jira, Postman, GDB
- **Other:** REST/JSON APIs, microservices, batch processing, IBM server environments, technical documentation (EDD), SIT/UAT support, software testing | Malay, English

AWARDS & CERTIFICATIONS

- **Dean's Award, UTeM** – five semesters (2022/2023 Sem 1 & 2; 2023/2024 Sem 1, 2 & 3)
- **Gold Medal, Workshop II Innovation Competition (MelakaGo)** – UTeM, January 2024
- **Google Cloud Computing Badges** – Google Cloud, 2024
